PROFESSIONAL SUMMARY

Aspiring Cloud Engineer with hands-on experience deploying and provisioning AWS infrastructure (EC2, S3, VPC, IAM) and automating multi-tier architectures with Terraform. Pursuing the **AWS Certified Cloud Practitioner (CLF-C02)** certification alongside practical work hardening EC2 instances and building a modular Terraform 3-tier web application (VPC, EC2, RDS, ALB, Auto Scaling). Experienced deploying production, real-time backend services (Node.js, Socket.IO, MongoDB Atlas) and full-stack ML platforms with REST APIs. Skilled in ETL pipeline construction, Python-based data analysis, and Power BI reporting.

TECHNICAL SKILLS

Cloud & DevOps: AWS (S3, EC2, SageMaker — in progress), Flask REST APIs, WebSocket, Git, GitHub, FFmpeg.

ML & Deployment: Python, Scikit-learn, TensorFlow (EfficientNet CNN), Predictive Modelling, Model Evaluation, Feature Engineering, NLP, TF-IDF, SVM.

ETL & Data: ETL Pipelines, Pandas, NumPy, SQL, MySQL, Data Preprocessing, Power BI, Matplotlib, Seaborn.

Certifications: AWS Certified Cloud Practitioner – CLF-C02 (In Progress) | Machine Learning with Python – IBM Coursera | Python for Data Science & AI – IBM Coursera

WORK EXPERIENCE

Machine Learning Engineer Intern — GRADTWIN

Feb 2026 – May 2026

- Built and evaluated supervised predictive models in Python using Scikit-learn — implementing feature engineering, preprocessing pipelines, and cross-validation to optimise model accuracy on structured datasets.
- Delivered end-to-end ML solutions by translating business requirements into model specifications, benchmarking performance metrics, and documenting results for stakeholder review.

Data Analyst Intern — Owl AI (Overload Ware Labs AI)

Sep – Oct 2025

- Constructed ETL pipelines using Python (Pandas) to ingest, clean, and transform multi-dimensional datasets, then visualised findings in Power BI dashboards to drive stakeholder decisions.
- Identified data quality issues across 20+ reports and applied preprocessing techniques that improved downstream analysis reliability and business recommendation accuracy.

AI & ML Intern — NSIC Technical Service Centre

Jan – Feb 2025

- Executed end-to-end data analysis workflows — ingestion, cleaning, EDA, and reporting — using Python and Power BI, delivering KPI dashboards for non-technical stakeholders.

PROJECTS & RESEARCH

EduSense AI — ML-Powered Educational Platform | *Python · Flask · Groq LLM · Whisper ASR · DeepFace · REST API · WebSocket*

- Built and deployed a full-stack predictive ML platform that transcribes lecture videos via Whisper ASR and serves automated quiz generation, summarisation, and student engagement inference through 20+ REST API endpoints.
- Engineered real-time inference pipeline using Flask-SocketIO and DeepFace emotion recognition (7-class classification → attention score), plus a PDF-parsing ETL pipeline feeding an AI Exam Predictor ranked by Bloom's taxonomy.

RoadResQ — Roadside Emergency Assistance Platform | *Node.js · Express · Socket.IO · MongoDB Atlas · Firebase · Tailwind CSS*

- Built a full-stack, real-time roadside emergency assistance platform being developed toward a startup launch, with a Node.js/Express + Socket.IO + MongoDB Atlas backend deployed on Render for persistent WebSocket support.
- Implemented Firebase Admin SDK authentication, Nodemailer/SendGrid email alerts, rate limiting, and Helmet security hardening; redesigned the frontend with a Tailwind glassmorphism dark theme and live backend integration.

Brain Tumor Classification — Deep Learning | *TensorFlow · EfficientNet CNN · MRI Analysis* | *Published COACONS 2025, Certificate of Merit*

- Trained an EfficientNet CNN model (TensorFlow) to classify brain MRI scans across multiple tumour categories — awarded Certificate of Merit at the Conference on Advances in Communication Networks & System.

EDUCATION

B.Tech — Artificial Intelligence & Data Science — **Paavai College of Engineering** 2022 – 2026 | CGPA: 7.7
Higher Secondary (CBSE) — **Kurunji CBSE School**, 2022 | Score: 75%

AWARDS

- "Engineering Excellence" Award — Uniconverge Technologies | Published researcher — ICON'26 2026
